Abstract

First sentence. Second sentence. Third sentence. Fourth sentence.

1 Introduction

2 Data

here() starts at /Users/yang/Downloads/Git/Political_Deepfake_Videos

3 EDA

3.1 treat distribution

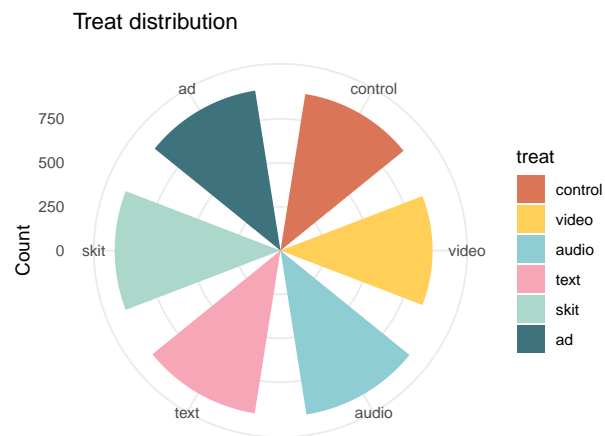

Figure 1: Employee numbers distribution

*Code and data are available at: [LINK](#).

3.2 education level distribution by PID

3.3 sexism by education level

Figure 2: sexism by education level

3.4 internet usage by meta.os

3.5 post favor by treat

4 Model

$$Pr(\theta|y) = \frac{Pr(y|\theta)Pr(\theta)}{Pr(y)} \quad (1)$$

Equation (1) seems useful, eh?

Here's a dumb example of how to use some references: In paper we run our analysis in R (R Core Team 2020). We also use the `tidyverse` which was written by Wickham et al. (2019) If we were interested in baseball data then Friendly et al. (2020) could be useful.

We can use maths by including latex between dollar signs, for instance θ .

5 Results

6 Discussion

6.1 First discussion point

If my paper were 10 pages, then should be at least 2.5 pages. The discussion is a chance to show off what you know and what you learnt from all this.

6.2 Second discussion point

6.3 Third discussion point

6.4 Weaknesses and next steps

Weaknesses and next steps should also be included.

Appendix

A Additional details
